

Alliance Data Provides Card Services Performance Update For May 2018

June 15, 2018

Alliance Data Systems Corporation (NYSE: ADS), a leading global provider of data-driven marketing and loyalty solutions, today provided an update on its Card Services segment.

In conjunction with the release of the Company's Master Trust Monthly Noteholder's Statement, the Company is releasing similar metrics for the overall total managed portfolio. The Master Trust data represents a subset of the Company's total managed portfolio, and the Company believes the information presented below provides a more complete view of the Card Services segment.

	For the month ended May 31, 2018	For the five months ended May 31, 2018
(dollars in thousands)		
Average receivables.....	\$ 17,542,262	\$ 17,636,936
Year over year change in average receivables.....	11%	13%
Net charge-offs.....	\$ 93,161	\$ 480,672
Net charge-offs as a percentage of average receivables ⁽¹⁾⁽²⁾	6.4%	6.5%

(1) Compares to 6.4% and 6.6% for the month and five months ended May 31, 2017, respectively.

	As of May 31, 2018	As of May 31, 2017
(dollars in thousands)		
30 days + delinquencies - principal.....	\$ 921,744	\$ 755,013
Period ended receivables - principal.....	\$ 17,057,237	\$ 15,340,126
Delinquency rate ⁽²⁾	5.4%	4.9%

(2) Delinquency and net charge-off rates will be elevated for the first part of 2018 as accounts that were provided a two-month leniency period due to last year's hurricanes will roll through delinquency. In addition, net charge-off rates will be impacted by lower recovery rates as the Company transitions from third-party sales of written-off accounts to in-house collections in order to realize higher long-term recovery rates. Both of these factors are expected to be transitory and dissipate as the year progresses. As such, the Company is targeting a full-year loss rate of 6%.
